

Tillämpning

Radialfläkt anpassad för industriellt bruk. Används för transport av rena medium. Lämpar sig för applikationer med lågt tryckmotstånd.

Konstruktion

Fläkten är direkt driven med dubbla inlopp och har fläkthus tillverkat i galvaniserat stål. Fläkthjulet har framåtböjda skovlar (hjultyp F) och är även det tillverkat i galvaniserat stål. Fläkten är omålad.

Motorer

Produkter monteras i standardutförande med en asynkron enfasmotor för drift i 230V 50Hz eller trefasmotor för drift i 230/400V 50Hz (motoreffekt < 4kW) eller 400/690V 50Hz. Motorerna uppfyller IEC-standarder 60072 och 60034, har kapslingsklass IP44 och isolationsklass F. Motorerna är utrustade med TP-sensorer. Om inget annat anges är motorns maximala omgivningstemperatur 40°.

För frågor om varvtalsreglering med hjälp av transformator eller frekvensomvandlare ber vi er höra av er till oss på Ventur. Vid förfrågan erbjuder vi även att montera motorer för annan drivspänning, med diverse sensorer eller i andra specialutföranden för att möta era krav och önskemål.
